12/20/2023

Project Eden 1

Is a meaning of ongoing construction site for on
Space station that you can call it
it like that!!!

Delivery and landing day
control from the
Templar

Diameter of the Space station

rings that cycle to
produce 1G

between the rings are transportation vessels
that bring people from one ring to another.

The ongoing construction site should be delivered from
cheap Rockets, that developing and design was made from
US,

Length of the Space station

document n: P17H17X1B

The Space and the first 2 rings in Sol system was
planned to be controlled from the U.S. H. Spaceforce, after
this more than 2 1/2 years I change my mind. The
Military of the Kingdom already mobilizing, and
like stupid apps, have to be made on sentence like
my cook is bigger than yours. As now existent
Constitution, will be this things here not realized.

The room between the Rings was planned 400 - 600 m
The first two rings was planned to be assets of the
Temple, the people should be American with no fee and
costs, The infrastructure will be made in 1 to 2 years
to launch the Rockets, to build this Station and it
was Trillion of dollar per day. The rings are stay in place
with tractor beam and other things that the Templar
already put in place and was ~~stolen~~ stolen through the
communism party slavery device!!!
