Document by: PITHOTTT

In acordation of the Energy problems, thro growing population and technologie, thro growing ability to put on huge transportation infrastructure on the Electricity grid, (love to be upgraded) we the Templar Find on possibility to obtain this energy in an value that you can call it like that.

The Yelastone have the capacity to deliver That, there is project Diamond that I will put here to public.

the line of Electricity power plant will give USA the stability and the power to grow, The tube are Diamonds and the project are more than 10 trillion Dollar value maybe more. The motor will be evaluated and olipited in the basic elements, stored and used

Document no: P17A0 TTT

Also on Hawaii and other places

This are realizable projects for the U.S.A.

Project Diamond

Train that will
the Real the bridge system
and Drill the hole

Drilling head

high pressure water
cutting system

Don't have to be exchange
so fast, the material
can be easily put out
investigate the different
seasons, like U. R. I.,
so that can be evaluated
what resources are in the
pipe, with an other system
that I can put to paper on
the digital motor in
resources exchange
