Mascot of Washington D.C.

(second per second surveillance)

As I pull my wagoners behind me(gifts from so many people stolen from Government with Paper together,insurance health care, result keto acidosis)

I thought that it will be a nice Idea to have to donkeys to pull al this things sit o n the wagoner and let the donkey pull the wagoner maybe with an order from some customer to deliver things!!! As know the Washington D.C. Mascot is the Donkey and there is no regulation about Donkey and permit, is a good idea to open a small business,

500 to 1500 a Donkey so is not so much to have because they eat a lot of stuff, water melon, lovely animal ho everyone love and have some commercial effect!!! With some blanked on it to commercial some business during the delivery! You eat the water melon and the rest give it to the donkey!

Some dry food like rice and beans from dollar store is good to! The rest on the green areas!!!

A good idea this is why maybe the Donkeys are growing in price since I say that ?

The delivery can made than with 3 or 6 wagoners made like an train those maybe from Wallmark, Amazon, or Home Depot transportation wage.

with low budget and no permit get you first transportation LLC

Hereby I affirmotive this as my sentences and
